Simplificando procesos

We are a proudly Mexican company with extensive experience being suppliers of **products, solutions and services for the Industry** through partnerships with international manufacturers, in conjunction with a **quality service** designed to simplify processes.

### Why work with us?

We supply products of leading brands in the industry, with distribution throughout Mexico. Our corporate office is in the north of the country, an industrial zone, that facilitates us to meet the requirements through a Robust and effective logistic system.

In our **Automation & Control** division, we promote products that help simplify processes with great ease and are mostly compatible with other platforms, as well as specialized products for Industry 4.0.

Conveyors and Material Handling, is our specialized area of engineering and applications, responsible for the development and implementation of material handling projects focused on end of line and food and beverages, which allows us to offer complete solutions to help you improve and update productive processes.

### Our clients

We collaborate with top national and international industries, who have trusted us to optimize and innovate their processes.

### Work team

Our team of experts focuses on providing and designing effective solutions, offering from the beginning a consultative sale, from simple automation products to complete flow systems, where We provide personalized attention.

**Our services** In SDI we distinguish ourselves by offering free technical support, unlike our competitors, we have online courses in which you can access our webinars and tutorials.

We also have a **service center** where warranties can be processed directly.

Our philosophy of Simplifying Processes, to make faster queries, prices and purchases, we offer an **online store**, where we have more than 18,000 products ([www.sdicontrol.com](http://www.sdicontrol.com)), with an online technical support system dedicated to solve any doubt or problem related to the products or services that we offer.

Our clients can quote and make their purchases online, quickly and safely, certified with the seal of trust of the Mexican Internet Association.

We have **import and logistics** door to door to facilitate this process to our customers, with short boarding time.

We provide **in-house design** and qualified collaborators that make the required modifications for custom equipment such as:

- Provide and install high efficiency and continuous production equipment
- Engineering service
- Project management
- Post sale service
- Preventive and corrective maintenance

Not only do we sell and install the equipment, but we find the right solution that each client requires and exceed their expectations.
